

Safe in every respect

The barriers comply with all legal standards

mAGNETIC[®]
ACCESS TO PROGRESS

Providing legal certainty when operating your barrier systems

Providing legal certainty when operating your barrier systems
The following regulations and directives are valid in Europe for the use of power-operated or motorised barriers: the Building Products Regulation No. 305/2011, if pedestrian traffic cannot be excluded, the Machinery Directive 2006/42/EC, the Low voltage Directive 2014/35/EU and the EMC Directive 2014/30/EU.

These regulations and directives specify the minimum level of protection required for making building products and machines available on the market. This also includes barrier systems. In order to comply with these regulations, a declaration of conformity in accordance with the Machinery Directive and EMC Directive must be produced for the barriers before they are made available on the market. If pedestrian traffic cannot be excluded using structural measures, a declaration of performance also has to be produced.

You will automatically receive these documents from us when purchasing a Magnetic barrier. This ensures that you are also on the safe side from a legal perspective. We take on the responsibility for you! A visible sign of conformity with these regulations is the CE Mark that is included on the type plate for the barrier systems.

Save time and money!

As CE conformity for the entire system (for inductive loops, light barriers and scanners from the Magnetic range) has already been verified, you are not required to provide any further documentation after installation to comply with the regulations. Instead, you will receive the following from us:

Declaration of conformity in accordance with the Machinery Directive for the entire system

- ✓ Safe control systems (EN13849)
- ✓ Compliance with all relevant EN standards
- ✓ Protection of people and property
- ✓ EMC tested (electromagnetic compatibility)

Declaration of performance in accordance with the Construction Products Regulation, tested by TÜV Nord

- ✓ Wind load
- ✓ Safe opening
- ✓ Compliance with impact forces

UL certificate for USA and Canada

- ✓ According to UL325

Access to Progress

Magnetic stands for pioneering products – in every way. Our access control systems for vehicles or pedestrians clear the way for thousands of people every day – at car parks, toll gates, stations, airports and in buildings. Our technology is also pioneering, however: with innovative drives, intelligent control systems and well thought-out details it provides maximum safety and longevity. Are you also on the path to Magnetic?
