Parking Pro
Car park barrier

For heavily frequented parking facilities
In a multi-storey car park or an underground garage, Parking Pro barriers from Magnetic are the ideal solution for professional parking applications. Thanks to their configuration and security settings, Parking Pro barriers are designed for use in heavily frequented facilities in which the movement of persons can be ruled out. Rapid opening times and the detection of tailgating vehicles ensure reliable processing for users, while low energy consumption, low-maintenance components and simple servicing keeps running costs down permanently. The barrier booms are optimised for use in parking applications: with the boom break-away option, for example, the boom is completely jettisoned in the case of a forced unauthorised passage – and it can be re-attached again without any impairment of function. In addition, visibility can be further increased by means of lighting elements and an expansion set. At the heart of the car park barrier is the innovative MHTM™ drive, characterised by its energy efficiency, lack of maintenance, and long service life – the Parking Pro is designed for 10 million opening and closing cycles.

Professional parking solution
The Parking Pro is the first choice for operators of multi-storey car parks and solution suppliers thanks to its rapid opening times, low operating costs, easy handling, great reliability and extraordinarily long service life.

Innovative drive technology
The MHTM™ drive unit operates without maintenance, energy-efficiently and quietly. Its high torque ensures best possible operation even under extreme weather conditions.

Legal security
All barriers from Magnetic have a conformity declaration in line with the Machinery Directive and a performance declaration according to the EU’s Construction Products Regulation. So operators and installers are always on the safe side regarding liability issues.

Easy access to components
Two simple hand movements suffice: easy access to the control system and drive unit by removing the hood and front panel. This increases user-friendliness and speeds up commissioning and servicing.
Parking Pro  
Car park barrier

- Reliable detection of tailgating vehicles
- Low power consumption for economical operation
- Optimum accessibility for particularly easy maintenance
- German Design Award 2014 and red dot design award 2012
- Designed for 10 million opening and closing cycles

MAGNETIC AUTOCONTROL GMBH
www.magnetic-access.com
Magnetic stands for pioneering products – in every way. Our access control systems for vehicles or pedestrians clear the way for thousands of people every day – at car parks, toll gates, stations, airports and in buildings. Our technology is also pioneering, however: with innovative drives, intelligent control systems and well thought-out details it provides maximum safety and longevity. Are you also on the path to Magnetic?
