

Declaration of Quality

The manufacturer MAGNETIC AUTOCONTROL GmbH this is to certify that the delivered product:

Description	Motor
Typ	MHP2(all types)
From Serial-No.	all

is in accordance with the internal quality standards, especially the statistical values for:

MTBF (Mean Time Between Failure) for mechanical components: 100.000 hours
MCBF (Mean Cycle Between Failure) for mechanical components : 10.000.000 cycles
(when used in Magnetic Flow Motion pedestrian gates)

MTBF (Mean Time Between Failure) for electronical components: 50.000 hours
MCBF (Mean Cycle Between Failure) for electronical components: 10.000.000 cycles
(when used in Magnetic Flow Motion pedestrian gates)

The statistical values are based on lifetime tests and / or calculations and are valid for the use under the operational conditions specified in the instruction manual.
